

- Grown Holistically, Probiotically, and Sustainably
- No Synthetic Pesticides or Inputs
- Abundant Full-Spectrum Terpene Profiles
- Expertly Greenhouse-Grown in the California Sunshine

SINCE 2005, MOONTIME MEDICINALS HAS WORKED INTIMATELY WITH NATURE TO PROVIDE EXTRAORDINARY CANNABIS PRODUCTS OF HUMBOLDT COUNTY

WE SEE OURSELVES NOT ONLY AS YOUR "BEYOND ORGANIC" CANNABIS FARMER BUT EQUALLY AS STEWARDS OF THE LAND.

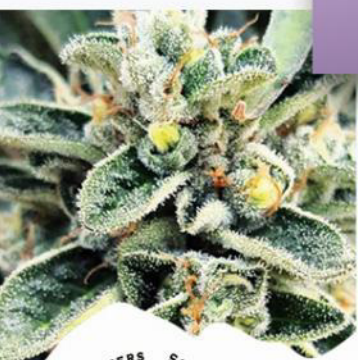

We have no interest in competing with industrial-sized cannabis producers. The flowers we grow and the small-batch concentrates we produce with our partners are intended for a more sophisticated audience with the experience to recognize exceptional terpene profiles, curing and aesthetic flower characteristics.

If you are new to cannabis, you are certainly welcome too. Know that starting at the top can educate your palate very quickly and you will soon have the experience to discuss a wide range of exceptional cannabis qualities. We live along the South Fork of the Eel River Watershed in Humboldt County and our flower is unique because of the microclimate of the farm.

All of our flower is grown in living soil. That means the soil we grow in has abundant life activity, probiotic fungal systems and microbe communities. It is this life force that moves up the plant stalk to ensure a thriving cannabis plant with varied nutrients to support impressive and varied terpene aromas and beautiful coloration.

WE ARE A FAMILY FARM GROWING ON OUR OWN HOMESTEAD. MOONTIME IS PROUD TO REPRESENT THE VALUES OF HERITAGE FARMERS IN THE EMERALD TRIANGLE.

IN LOVE WITH NATURE

All of our flower is grown in living soil. That means the soil we grow in has abundant life activity, probiotic fungal systems and microbe communities. It is this life force that moves up the plant stalk to ensure a thriving cannabis plant with varied nutrients to support impressive and varied terpene aromas and beautiful coloration.

We incorporate a wide range of permaculture and probiotic farming techniques so that you can be assured that our cannabis will not only be grown to delight your customers, but also will be synthetic-chemical free. When your customers choose Moontime, they can be secure in the knowledge that your cannabis was grown in cooperation with nature instead of stolen from nature.

We companion plant non-cannabis species alongside our cannabis for an array of benefits such as attracting beneficial insects and trapping garden pests. We use cover crops to fix nitrogen and retain moisture while encouraging living soils.

We use rainwater catchment and store spring-fed water in the winter, leaving water in the local streams during the hot summers. We also incorporate practices that curtail sediment and nutrient runoff into the surrounding watershed.

This “closed-loop” farming technique means that we can deliver rich-tasting and aromatically powerful cannabis while protecting the environment and often, improving it.

Moontime Medicinals is a proud supporter of the Save Van Arken project protecting vital forest land.

Certainly some customers are looking for inexpensive mids, but store prestige and retail brand recognition comes from providing quality as well. Stock Moontime Medicinals branded flowers, extracts, distillate, and rosin oil with the knowledge that your customers will adore their aromatics and that they were produced holistically, in love with nature.

MOONTIME MEDICINALS EXTRACTS ARE MADE IN PARTNERSHIP WITH TERP PRESERVATION SOCIETY
